

course, was too slow, although everything aboard of her was wide open, and the Reliance passed her before the line was reached. All the ocean-going tugs and many of the steam yachts were left astern in the mad race. Just before the finish, the wind died down, but Reliance went across in another time to win, having covered the ten miles in 47 minutes, 40 seconds.

Then followed the usual riot of whistles, mingled with the wall of steam, the clamor of bells, the exultant shouts of sailors and the booming of cannon. The Reliance was about a mile astern and crossed four minutes and forty seconds later, to a repetition of the riot which had welcomed Reliance's victory. Then the great observation fleet headed back to New York at top speed, not waiting to follow the racers in.

It was a hard day for the overworked newspaper reporters. There are three methods recognized for reporting a yacht race: the wireless telegraph system, the fleet of small boats carrying the news from the course to the shore, and a line of shore observers along the Jersey and Long Island coast. This was a day on which all three systems proved a failure. The experience of two years ago demonstrated the comparative uncertainty of all wireless telegraph, but no one was prepared for the utter collapse of the system which occurred today. There were four competing systems, three of which were most active. Atmosphere above the triangular course was beaten into a hopeless confusion so that the Marconi system, with all its careful preparation throughout the entire day, it would not have been so exasperating if the rival companies had been honestly striving to send their own bulletins, but much of the interference was obviously malicious.

#### DETAILS OF RACE

##### Challenger Lost Nineteen Seconds in Getting Started.

(By Associated Press.)  
NEW YORK, August 25.—In the preliminary jockeying, Captain Barr, of the Reliance, got the windward position, handkerchief the Shamrock III, and clung to it through various manoeuvres until the warning gun had been fired, when Captain Wringe had got clear of the Reliance.

At the sound of the gun Shamrock III, bore off to leeward and away from the Reliance, while Captain Barr tacked under the stern of the Navigator as the starting gun was fired, and crossed the line only thirty-seconds behind the gun. The Shamrock III, kept away from the line almost until the handicap gun, then tacked and crossed it, handicapped by nineteen seconds, for which no allowance was made to her. The nineteen seconds was dead loss.

The official starting time was: Shamrock III, 11:02:00. The actual starting time of Shamrock was 11:02:10.

Once fairly away Captain Wringe, of the Reliance, resumed his tactics of the previous race, gave his boat a good rap full and sailed through the Reliance's lee and got under her lee bow. Captain Wringe's manoeuvre gave him a wind clear of the Reliance, and he sailed on a big reaching jib top-sail, in which the Shamrock promptly followed suit. The two yachts held their relative positions for about a mile, when the Reliance was a mile from the finish line the Shamrock came bounding along, carrying a splendid breeze and fast overhauling the Reliance. It looked as though the British boat was going to get within her time allowance, but the finish line was too near, and the Reliance slipped across it with one minute and nineteen seconds to spare.

The official time: Elapsed Corrected Name. Start. Finish. Time. Time. Reliance ..... 11:09:36 2:15:30 3:14:54 Shamrock III 11:02:00 2:20:10 3:18:10

The next race will be sailed on Thursday. The official time: Elapsed Corrected Name. Start. Finish. Time. Time. Reliance ..... 11:09:36 2:15:30 3:14:54 Shamrock III 11:02:00 2:20:10 3:18:10

Half an hour after the start the gap between the two boats had widened materially. Reliance was pointing higher and the Shamrock footing faster. They were half a mile apart when they tacked. Reliance was the first to go about. When both yachts were filled away it was clear that the Reliance was gaining. Shamrock III was far astern and very little was heard of the Reliance's course. Meantime the wind had been increasing, and was now blowing at the rate of seven knots. The race was being fought out on the same lines as the previous one. The Reliance sought to make her gain by the latter endeavor to make up for what she lost in pointing by footing faster with a rapt full.

At noon the wind had increased to ten knots, and hauled about a point to west. So that both yachts could lay a straight course to the turning mark, not more than two miles distant. Without making another tack both boats had made the turn of the first mark as follows:

Shamrock III ..... 12:24:45. RUN BEFORE WIND.

Though the Reliance had a lead of three minutes and fifteen seconds, she still lacked six seconds of making up the time allowance and the difference of one minute and twenty-four seconds at the start. Both captains broke out balloon jib top-sails when they squared for the second turn. The wind was so far aft that they quickly discovered that instead of being a broad reach, as intended, the course to the turn was a broad reach. The Reliance was the first to square, and the Shamrock was the first to square. Both yachts were heading off their course a bit in order to make their spinners draw well, and they ran that way for half an hour, when the Reliance smothered her spinners and the Shamrock stayed on her course. A few minutes after Reliance, the Shamrock also took in her spinners. With the wind over their quarters, both yachts made fast time of it, but it was apparent that Reliance was gaining. They made the second turn as follows:

Shamrock III ..... 1:17:50. The Reliance was leading by three minutes, fifty-five seconds, having gained forty seconds in the run across from the first to the second mark. She had overhauled the Shamrock by the time the difference at the start and established a margin to her credit of thirty-four seconds. With a close race still to be made, there was faint hope for the challenger.

CLOSE REACH. The Reliance whirled about the mark, gybed over, trimmed in her sheets, and tacked away on a close reach towards Sandy Hook lightship and the finish line. She was three-quarters of a mile away before the Shamrock rounded the mark. Both yachts were heading before a twelve-knot wind from south by west, and were sailing at least one mile an hour faster than the wind was blowing. Their sheets were eased just enough to put them on almost their true course, and sailing on one upon which the Reliance has often demonstrated that she is faster than any racing craft ever built. She was heeled just enough to bring her long overhang to bear and give her the benefit of her great sailing length.

WIND SOFTENED. As the wind softened the Reliance first

Liver and Kidneys

It is highly important that these organs should properly perform their functions. When they don't, what lameness of the side and back, what yellowness of the skin, what constipation, bad taste in the mouth, sick headache, pimples and blotches, and loss of courage, tell the story.

The great alternative and tonic

Hood's Sarsaparilla

Gives these organs vigor and tone for the proper performance of their functions, and cures all their ordinary ailments. Take it.

From the beginning to the end of the war 448,435 troops were engaged, and owing to the drain caused by the South African defense Great Britain became dangerously weak in 1900.

The commission asserts that the true lesson of the war is that no system as satisfactory which does not contain the power of expansion outside of the limit of the regular Imperial forces, and composed of the necessity for a higher degree of intelligence in the men and a well educated staff.
